

BBC (Birko Brewery Cleaner)

The BIRKO logo is a circular emblem with a blue center containing the word "BIRKO" in white, bold, sans-serif capital letters. This center is surrounded by a ring of green and yellow segments, suggesting a globe or a circular process. The entire logo is set against a background of blue and green water droplets.

Save time, money and water when cleaning your brewhouse and fermenters

Running a brewery is no easy task. You're on the clock at least 12 hours a day. And, you're looking for ways to make your job easier and faster without compromising safety or the quality of your beer. Look no further than Birko's new powdered brewery cleaner — BBC.

About Birko Brewery Cleaner (BBC)

- Powdered non-caustic, alkaline cleaner formulated specifically for brewery CIP (clean-in-place) brewhouse and fermenter cleaning.
- Removes yeast, krausen (trub) and other brewery soils without using a high-caustic substance.
- Does not contain solvents, caustic soda, chlorine or phenol.
- Compatible with aluminum, iron, copper and stainless steel.
- Available in 8-pound jars, 45-pound pails and 100, 200 and 450-pound drums.

Key Benefits

- Cleans and rinses better than other powdered brewery washes on the market.
- Effective in mash tuns, brew kettles, fermenters, heat exchangers, lines and kegs.
- Works well across a wide range of water temperatures, from 120-160°F (30-50°C).
- Rinses well — no silicate or battleship gray film on your tanks!
- Priced competitively — craft brewers, including nano, micro and regional brewers, can easily fit it into their budget.
- Backed by the best technical experts and master brewers in the industry.

“BBC cleans and rinses better than any other powdered CIP cleaner we've used. It required less water to rinse it off our equipment, which will help us reduce our water usage and conserve a significant amount of water in the long run. I am meticulous about how we clean our lines, and this product delivered without impacting the final taste of our product. I've already placed my first order for BBC.”

Joe Savage,
head brewer, Odyssey Beerwerks, Arvada, CO

**The ultimate “one shot” powdered cleaner
for brewhouses and cellars**

BBC (Birko Brewery Cleaner)

Use BBC to Clean:

- Brewhouse (mash tun, kettle, whirlpool, heat exchanger)
- Fermentation vessels (FV)
- Brite tanks, serving tanks in brewpubs
- Automatic dishwashers — great for beer glassware
- Kegs
- Parts

How to Use BBC

- Use 1-2 oz. (30-60 grams) of BBC per gallon of hot water (120-160° F).
- Rinse immediately and completely with potable water, preferably the same temperature with which you are cleaning, which works better and is better for the metal.
- BBC is a cleaner, not a sanitizer. Clean, rinse well, then sanitize.
- As with any chemical in the brewery, wear chemical-resistant gloves and eye protection when handling BBC.

WHY BIRKO

- Birko has a long history of delivering cleaners, sanitizers and process aids to craft brewers.
- Our customers enjoy improved product shelf life and consistent flavor profiles.
- Our technical experts and master brewers are always just a phone call away. And you won't go months without hearing from us.
- Award-winning breweries trust Birko. 25% of the 2016 Great American Beer Festival medal winners brew with Birko.
