Birko Launches PoulChlor Foam Cleaner for Poultry Processing

The cost-effective chlorinated cleaner is formulated for hard-to-clean areas

HENDERSON, Colo. – [Birko](#), a leader in providing integrated sanitation solutions, has launched its new chlorinated foam cleaner, [PoulChlor](#), for the poultry processing industry and beyond. The cost-effective, all-in-one solution contains detergents, chlorine and alkaline caustic for hard-to-clean areas.

“PoulChlor is a vital solution for the poultry industry,” said Brad Bray, senior formulation chemist at Birko. “Choosing the right sanitation chemistry is a necessity in fostering Category 1 status for processors and preventing Salmonella growth.”

The liquid, self-foaming formula can be utilized as a chlorinated cleaner for all equipment. After diluting 2-12 ounces of the solution in a gallon of water and applying the foam, the user should rinse the equipment thoroughly with potable water.

To learn more about PoulChlor, download the online [technical data sheet](#) or contact Brad Bray at bbray@birkocorp.com.
